Monthly on Thursdays at:
Cedar Park Church

Defeating Atheism with Science March 20th at 7PM

Description: Many atheists claim that science disproves the Bible. Despite these claims, science is actually quite consistent with Scripture. Christians often feel unequipped to defend their faith in this area -- but this need not be so. Instead, any Christian can defend his or her faith against any scientific claim from an atheist, even without knowing the details of that particular claim. Why? Because science itself disproves atheism. Atheism, when taken to its logical conclusion, denies the fundamental assumptions and requirements of science. Therefore, if science is valid, then atheism must be false.

In this presentation, engineer and former atheist Spike Psarris will present on "Defeating Atheism with Science," showing why this is true. Join us as we discuss how Christians can defend their faith in all areas of science. After a brief discussion of specific evidence like fossils, radiometric dating, and intelligent design, we'll dig deeper and see how science itself disproves atheism. Understanding a few fundamental ideas about science are all that's necessary for any Christian to be well-equipped in this area.

About the Speaker: Spike Psarris was previously an engineer in the United States' military space program. He entered that program as an atheist and an evolutionist. He left it as a creationist and a Christian. He now speaks on creation and Christian apologetics, equipping believers to defend their faith and glorify their Creator.

The Apologetics Symposium will occur on the 3rd Thursday each month, and feature multimedia presentations by speakers, scientists, and authors who are dedicated to defending the Bible against naturalism. The events are free and open to the public and generally suitable for ages 11 and up. Educational resources will be available for sale from the NW Creation Network.
